

The Totem Navigational Rally

November 19-20, 2022

Presented by West Coast Rally Association

While most restrictions due to Covid-19 have been lifted, this event will still observe some protocols to reduce the chance of transmission. There will be no in-person novice training session this year. Waivers will be submitted electronically in advance of the event. In place of technical inspection, teams will be asked to sign a self-declaration that they have all of the mandatory equipment, and that they comply with their class limitations. That declaration can be brought to the start of the rally and exchanged for door numbers and your route book. At the end of each day, rather than physically checking in at MTC, we will ask you to text the organizer to confirm that you have arrived.

Mask use: In the event that you need to get a ride from sweep or another rally official, we request that everyone in the vehicle be masked.

The Totem Rally is a navigational, time-speed-distance rally, part of the BC Rally Championship. The rally follows the current BC Rally Regulations, which are posted on www.rallybc.com. The rally runs on straight-forward instructions. In addition to the route instructions, maps will be provided. The rally will be about 800km long, entirely within the province of BC, and will start with an odometer check section of about 15km. Roads are expected to be about 50% clear pavement and 50% gravel, much of it snow-covered, however, conditions are extremely variable at this time of year. Instructions are provided in both km and miles, but the official measurements and calculations are based on the km figures.

Required equipment: 4 snow tires, 1 self-supporting, reflective warning triangle (30cm per side), first aid kit, 5BC fire extinguisher, open cars require a roll bar. Additional lights on the front should meet legal requirements as to type and mounting height; and must be wired to the high beam lights such that the additional lights turn off when switching to low beam. Fog lights may be wired independently.

Recommended equipment: map light, driving lights, warm clothing, shovel, tow rope, ice scraper. Some helpful hints: Handbrakes can freeze if left on overnight. Roads are often ploughed off their summer routes, so beware of snow-filled ditches. Maximum distance between gas stops is 250km (150mi) but remember that many cars get worse mileage in winter conditions. BC Highway regulations sometimes require vehicles without 4-wheel drive to carry chains. The sweep truck will have 4-wheel drive and a winch, but may not always be able to extract wayward cars from the BC scenery. Drivers are asked always to drive with their headlights on and to be particularly courteous to traffic not connected with the rally.

The rally will be divided into a number of legs, each leg ending with a meal stop or overnight stop. Each leg is divided into Transit stages and Regularity stages. Transit stages give a stage time that is adequate for completing the stage well within speed limits. Your time will not be recorded in these stages. Regularity stages list specific average speeds, which are below the posted speed limits, which you must maintain in each part of the stage. Your timing in these stages determines your score.

Timing controls will be in regularity stages only, at various unannounced locations, and will not be placed within 200m of a stop sign, busy intersection, or a pause or caution instruction. Cars may not slow down

excessively within sight of a timing control. At the control official's discretion, the time may be recorded early when that happens. Procedure when approaching a control is simply to drive straight past without stopping. The control official will record your time. For double checking the results, you may wish to note the time and mileage at each control, but this is not required.

Timing & Scoring: Timing will be to 0.1 second, but scoring is one point per whole second early or late. This means that there is effectively a 0.9 second grace period either side of perfect time, to allow for inaccuracies in checkpoint position and timing accuracy.

In addition to staffed checkpoint locations, we will be testing the phone-based Richta timing app. This requires one dedicated smart-phone (iPhone or Android) in each vehicle, and uses the phone's GPS to log the time at which you pass each checkpoint location. Your times will be uploaded when you connect to Wi-Fi at the end of each day, or if you enable data, when you reach coverage. Time decs will be entered through the Richta app, but will be applied to the live checkpoints as well.

Time Declarations: The principles behind time declarations are as follows:

- Competitors should be able to stop and render first aid at an accident without penalty.
- Competitors should be able to stop and deal with a public situation (concerned local, grader blocking road, law enforcement etc.) without penalty.
- Competitors' own errors should earn them penalties.
- Competitors should not be able to engineer a lower score post-facto through a time declaration.
- Competitors requiring outside assistance (e.g. to extract them from a snowbank) should be penalized.

There will therefore be 2 categories of time declaration: For situations involving public safety (stopped for a red cross incident, stopped to determine if there is injury, stopped by a member of the public, heavy traffic making it impossible to pass, etc.) the time dec will not incur any penalty. For competitor's fault situations (missed a turn, couldn't make the average, blew a tire, mis-calculated the time, etc.) the time dec will cost you 20 points.

In order to simplify working with Richta, for this event all time decs will be considered "no fault".

The maximum penalty at a single control is 300 points (5 minutes) and the maximum penalty for a regularity stage is 600 points (10 minutes). Control officials will remain in place at least until all remaining cars are beyond 10 minutes later than absolute rally time. Ties will be broken by the most zero scores, then the most 1 second penalties, etc.

Officials of the Event:
